Notice of New Products (Silicon Nitride Ceramics : RECRYTE TN)

Tokai Konetsu Kogyo Company announces that it has succeeded in establishing a new production method for Silicon Nitride Ceramics.

The experimental production in 500 kg per month has been already under an operation, and upon its satisfactory appreciation given in a field evaluation, the Company will commence its commercial sales and production as from January 2007, with the brand name of RECRYTE TN. The particular advantages in this method are easy production process, low cost, flexible shape and various application. The sales volume of 5 tons per month will be soon expected to meet a demand from general and extensive application of Silicon Nitride Ceramics products, including mechanical parts and high resistance parts for molten Aluminum process.
